ROMULAN LANGUAGE GUIDE

STARFLEET COMMAND

BUREAU of
TRAINING

INTRODUCTION

This booklet is a general guide to the basics of the Romulan Language. It is not intended to be exhaustive but rather will provide the necessary basic communication skills needed in any unplanned contact with the Romulans. As such it is a required text for all Starfleet Academy cadets and/or Starfleet Officer Candidates.

For more complete information in the Romulan culture and language usage it is recommended that you consult the works of Terise Haleakala-LoBrutto. The Journal of the Federation Institute for the study of Xenosociology Vol. LXII, Numbers 88-109, or acquire a print-medium transcript of the literary work called "The Romulan Way."

Volume 2 of the Romulan Language Guide contains the complete Romulan Language dictionary as it is known as of this date and printing.

LESSON 2: PUNCTUATION

· is a word separation. There are no spaces between the words.

= indicates the end of a sentence or of a paragraph like a period.

+ indicates interrogative like a question mark does in English.

z z are quotes. Like in English they enclose the words being quoted.

LESSON 3: SENTENCE STRUCTURE

Basic Romulan sentence structure is:

subject - object - adjective - verb

Instead of saying "I read an old book." The Romulan would structure the sentence as:
"I a book old read."

LESSON 4: CAPITALIZATION

In the Romulan language, capitalization is used for proper names only. Never at the start of a sentence, or for a title.

To capitalize a letter you add a line above the letter. In the Romulan language the sound of the capitalized letter is slightly changed. This is very difficult to hear and will take years of practice to properly articulate.

The Romulan Language in addition to the standard alphabet, which is necessary to the production of word sounds, also contains a series of alphabetic sounds to describe verb tenses, and to make an object plural.

TENSES:

	Letter	Pronunciation
Past Positive:	H	a as in able
Past Negative:	⌘	ate
Present Positive:	no	addition to this tense
Present Negative:	-	oat
Future Positive:	O	aw as in awful
Future Negative:	⊖	ot as in otter

The letter is added to the end of the word being described.

EXAMPLE: The word cold: ⌘⌘⌘⌘
 ⌘⌘⌘⌘H was cold
 ⌘⌘⌘⌘⌘ was not cold
 ⌘⌘⌘⌘ is cold
 ⌘⌘⌘⌘- is not cold
 ⌘⌘⌘⌘O will not be cold
 ⌘⌘⌘⌘⊖ will be cold

PLURAL:

The letter * is added before the word to make it plural. It is pronounced like the letter z in zebra.

EXAMPLE: ⌘⌘⌘⌘O book
 *⌘⌘⌘⌘O books

ACCENTUATION:

In words of more than one syllable, the stress is always on the last syllable.

The only exception to this rule is the plural, where the stress is on the *.

A glottal stop is always used between two identical letters. An example in English is the word ski'ing.
